

Roman Petrov

SOFTWARE DEVELOPMENT ENGINEER IN TEST

North Attleborough, MA · 617.259.8620 · rpetrovqa@gmail.com · <https://www.linkedin.com/in/rmpetrov/>

Legal Status: U.S. Citizen · Free to relocate

Software Development Engineer in Test with 7+ years of experience in web and mobile application testing, specializing in UI and API automation for web applications, including e-commerce workflows, using Python, Playwright, and CI/CD pipelines. Drove key testing process improvements, including building automated test frameworks and implementing strategies to improve test reusability; these initiatives resulted in a 21% increase in overall testing efficiency. Recognized for contributions to product quality and promoted to Software Development Engineer in Test, while maintaining a 98% defect-free rate on initial deployments.

SKILLS

Programming & Automation: Python, Playwright, Pytest, Selenium, TestNG, SQL, Java, JavaScript

API Testing & Networking: REST, Postman, Python requests

CI/CD & DevOps: Git, GitHub Actions, Jenkins

Platforms & Tools: Windows, Linux/UNIX, macOS, TestRail, JIRA, Chrome DevTools

Databases: Oracle, MySQL, PostgreSQL

Testing Practices: UI, API, Agile, Regression, Integration, Exploratory, End-to-End Testing

PROFESSIONAL EXPERIENCE

Personify Health, remote from North Attleborough · Software Development Engineer in Test (Aug 2022 – Mar 2025) · Software QA Engineer (Jul 2019 – Aug 2022).

- Facilitated the development of a UI automation framework using Python and Pytest, covering 30% of regression scenarios.
- Wrote and maintained 80+ automated tests for login flows, forms, and data submission using Selenium and Playwright, reducing manual regression testing time by 23%.
- Created 40+ API validation scripts using Python's requests library, helping identify 15+ backend issues before release.
- Set up GitHub Actions workflows for nightly test execution, increasing early defect detection rates by 15%.
- Defined UAT test plans with Product Owners and scrum teams, reducing post-release defects by 18% and improving business alignment.
- Identified and reported over 500 software defects, ensuring timely fixes and improved application stability.
- Collaborated closely with developers, testers, business analysts, and marketing teams to ensure a clear understanding of project requirements and remove obstacles to customer success.
- Implemented key process improvements in testing practices and technologies, increasing overall testing efficiency by 21% and reducing defect resolution time by 27%.
- Introduced process improvements from QA discussions, reducing test execution time by 25%.
- Streamlined the setup and configuration of virtual environments and servers, cutting deployment time by 17%.
- Resolved over 200 customer-reported issues, contributing to a 15% increase in user satisfaction.
- Conducted functional, exploratory, and regression testing to enhance application stability and performance.
- Performed root cause analysis on major defects, reducing recurring issues by 31%.

Diasoft, Cheboksary, Russia · Software QA Engineer (May 2016 – Apr 2018)

- Developed and maintained 500+ test cases, improving test coverage and efficiency.
- Detected and documented 300+ defects, improving system reliability and performance.
- Collaborated closely with developers to reduce critical bug turnaround time by 32% through detailed defect analysis and debugging support.
- Drove knowledge-sharing initiatives by mentoring junior QA engineers and standardizing testing practices across teams.

EDUCATION

Bachelor of Economics and Management, (Sep 2009 – Jul 2013)

Saint Petersburg State University of Engineering and Economics
