

Roman Petrov

SENIOR QA ENGINEER | TEST STRATEGY & EXECUTION | DEFECT LIFECYCLE | AGILE QUALITY DELIVERY

North Attleborough, MA | 617-259-8620 | rpetrovqa@gmail.com

LinkedIn: [linkedin.com/in/rmpetrov](https://www.linkedin.com/in/rmpetrov) | GitHub: github.com/rmpetrov | U.S. Citizen

QA professional with 7+ years of experience validating web-based technology products through structured test planning, functional and integration testing, regression coverage, defect lifecycle management, and cross-functional collaboration. Strong background in translating requirements into test cases and test scenarios, identifying and reproducing defects, validating fixes, and supporting reliable software releases in Agile environments. Experienced in process improvement, root-cause-oriented analysis, and supporting automation efforts using Playwright, pytest, Python, and SQL-based validation. Known for clear communication, disciplined execution, and a strong commitment to quality.

SKILLS

Test Planning & Execution: test plans, test cases, test scripts, test scenarios, requirements analysis, release readiness

Testing & Validation: functional testing, integration testing, regression testing, smoke testing, exploratory testing, system validation

Defect Lifecycle & Root Cause: defect reproduction, defect documentation, retesting, validation of fixes, root cause analysis, issue management

Automation & Technical Validation: Playwright, pytest, Python, SQL-based checks, UI/data validation, API/data testing

Process & Collaboration: Agile methodologies, QA process improvement, stakeholder communication, developer collaboration, risk visibility

Tools: Jira, Confluence, TestRail, Git, Chrome DevTools, Playwright, pytest, Python, SQL

PROFESSIONAL EXPERIENCE

Personify Health (Remote)

Software Development Engineer in Test | Jan 2022 – Mar 2025

QA Lead | Jul 2019 – Jan 2022

- Developed and executed structured test coverage for high-impact SaaS releases, including functional, integration, regression, smoke, and exploratory testing across UI and data-related workflows.
- Created and maintained test cases, validation procedures, and QA documentation to improve consistency, test coverage, and release confidence.
- Logged and tracked 500+ defects with precise reproduction steps, expected vs. actual behavior, and supporting evidence, improving issue clarity and accelerating resolution.
- Worked closely with Product and Engineering teams to analyze requirements, identify risks early, validate fixes, and improve software quality before release.
- Used SQL-based and data-focused validation to support issue investigation, verify business rules, and improve confidence in system behavior.
- Contributed to QA process improvements that strengthened documentation quality, defect follow-through, and consistency across development cycles.
- Supported team effectiveness through structured communication, status visibility, and reliable follow-through across multiple initiatives.

Diasoft (Cheboksary, Russia)

Software QA Engineer | May 2016 – Apr 2018

- Performed functional, regression, and integration testing across business-critical software workflows.
- Created and maintained 500+ test cases and documented 300+ defects with clear technical descriptions and reproducible steps.
- Worked closely with developers during triage and troubleshooting to improve issue clarity, validation quality, and release confidence.

EDUCATION

Saint Petersburg State University of Engineering and Economics - Economics & Management coursework (2009–2013), degree not completed
