---

QA Engineer / SDET with 7+ years of experience in software quality engineering, test automation, and release validation, including QA Lead and SDET roles at Personify Health. Experienced in Python, Playwright, pytest, REST API testing, SQL, CI/CD, and troubleshooting distributed applications. Recent independent projects demonstrate TypeScript/Playwright automation framework development and Python-based LLM/RAG quality evaluation.

SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Java
Automation & Testing: Playwright, pytest, Selenium, BDD/Cucumber, TestNG, REST APIs, Integration Testing, Regression Testing, Test Strategy
CI/CD & Tools: Jenkins, GitLab CI/CD, GitHub Actions, Docker, Postman, Git, Jira, New Relic, Sentry, Kibana
AI Quality (Portfolio): LLM/RAG Evaluation, BM25 Retrieval, Regression Gates, Prompt A/B Testing, Human Semantic Review, Ollama

PROFESSIONAL EXPERIENCE

Personify Health (formerly Virgin Pulse/Welltok) | Remote
Software Development Engineer in Test | Jan 2022 – Mar 2025
QA Lead | Jul 2019 – Jan 2022

- Designed and executed functional, regression, integration, exploratory, and end-to-end tests across web, mobile, API, backend, and distributed SaaS systems.
- Built and maintained automated regression coverage using Python, Playwright, pytest, BDD, and reusable Page Object patterns.
- Validated REST APIs, service integrations, business rules, and backend data using Postman and SQL.
- Integrated automated testing into Jenkins and GitLab CI/CD workflows to support continuous testing and release readiness.
- Investigated complex failures across UI, API, backend, data, and environment layers using logs, monitoring tools, and test evidence.
- Reviewed requirements, identified quality risks, supported release decisions, and mentored QA engineers.

Diasoft
Software QA Engineer | May 2016 – Apr 2018

- Performed functional, regression, integration, and acceptance testing for enterprise financial applications; validated business rules and SQL data, and tracked 300+ defects through resolution.

INDEPENDENT ENGINEERING PROJECTS

Playwright TypeScript Quality Framework
TypeScript, Playwright, React/Fastify, GitHub Actions

- Developed a TypeScript/Playwright automation framework with 23 API scenarios and 23 UI scenarios executed in each of Chromium, Firefox, and WebKit — 92 total test executions.
- Implemented API contract and persistence validation, all 16 order-status combinations, parallel-safe test isolation, verified cleanup, network failure testing, and accessibility checks.

AI Quality Evaluation Framework
Python, pytest, RAG/LLM Evaluation, BM25, Ollama

- Developed an offline-first LLM/RAG evaluation framework with 24 synthetic scenarios, deterministic replay, regression gates, human semantic review, and 350 passing pytest tests.
- Conducted a small prompt A/B experiment demonstrating that improved automatic answerability scores can coincide with lower human-rated factual correctness; documented findings and limitations.

EDUCATION

Saint Petersburg State University of Engineering and Economics — Economics & Management coursework | 2009–2013
